

We are looking for new employees to strengthen our team:

Technical assistant to the management / validation specialist

Duties and responsibilities:

- Performance and support of validation and project handling duties in the manufacturing of medical devices made of plastic
- Performance of our routine cleanroom monitoring with a focus on the ventilation technology
- Qualification and requalification of production equipment with existing procedures
- Validation of new cleanrooms and revalidation of existing cleanrooms with existing procedures
- Support of the management in practical and administrative tasks
- Support in the areas of energy management and hygiene regulations

Your Profile:

- At least one specialist vocational training qualification in the fields of ventilation technology, automation technology, electrical engineering or plastics processing
- Basic knowledge of business administration
- Good PC and MS Office skills
- High safety consciousness, entrepreneurial way of thinking, creativity and enthusiasm for innovation

What you can expect:

- Varied and interesting range of tasks in a modern environment
- Employee benefits: Refreshments and fresh fruit freely available, subsidised lunch and free use of physiotherapy services
- Trusting work atmosphere and flat hierarchies for short decision-making processes
